### Maintenance and cleaning

We recommend to vacuum the furniture regularly and wipe the surface with a damp cloth as needed. Remove spills immediately. If stains and dirt cannot easily be removed with a damp cloth, a cleaning machine for furniture and carpets can be used with lukewarm water. Make sure to use as little water and soap as possible. Please follow the machine and cleaning agents instructions carefully. Professional dry cleaning is also an option. Pilling is a natural occurrence on products which are made of natural fibres, such as wool. The pilling will reduce over time and can easily be removed with vacuuming or a "fabric-shaver". We do not recommend impregnation of our wool fabrics.

### Fabrics

We are uncompromising when it comes to fabric quality, and we cooperate with suppliers that manufacture in accordance with strict quality and environmental requirements. If correctly maintained, the fabrics we have selected will help give the furniture a long life. All our upholstery fabrics meet and exceeds the requirements of mobelfakta.no for Hard Wear. To meet Hard Wear requirements, the fabric must pass international tests for durability, light fastness, pilling resistance, fire safety and colour fastness. Tested in accordance with ISO 105-B02 (Light fastness) EN-12947-2, Martindale (wear test), and with ISO 12945-2 (pilling) and ISO 105x12 (rubbing/dye, wet and dry) and IMO Part 8 compliant, BS 5852: Part 1:1979 s. 0&1 (Fire safety test).
