

NOBLESSE

First class furniture leather with a natural softness and a unique surface with visible characteristics.

Noblesse is the most exclusive quality leather offered by Stressless®. A full grain semi-aniline, it is dyed all the way through and has only a thin protective topcoat. This enables the leather to retain the natural softness and lustre that characterises a first-class furniture leather. A natural material like Noblesse retains its original grain and structure. Minor colour nuances and skin blemishes may also occur. Such individual details may lead to slight variations at different parts of the furniture. Although the topcoat provides a certain level of protection, Noblesse is the most delicate of the leathers used by Ekornes. It absorbs moisture easily, and is more vulnerable to wear and tear, heat, sunlight, spills and perspiration. Regular maintenance is important to maintain its attractive appearance.

Maintenance and cleaning

Vacuum the furniture regularly and wipe the surface with a damp cloth as needed. Remove spills immediately. If stains and dirt cannot be removed readily with a damp cloth, a cleaning agent from the Stressless® Leather Care Kit may be used.

We recommend that your leather furniture is cleaned and re-protected at least every six months with Stressless® Leather Care products.

Important to know about leather furniture

The leather for our furniture is a natural material that comes from cattle hides. One characteristic of hide is that it is marked by nature, vegetation, and the care the animal has been subjected to. Each hide is unique in its structure, appearance, nuances and size. Ekornes may use several hides when making your furniture. This, together with the leather's play of colours and natural marks, makes each piece of furniture unique. In time, the leather will age and develop a patina. Although leather furniture can withstand a lot of wear and tear, its appearance will change over the years.
