Maintenance and cleaning

We recommend to vacuum the furniture regularly and wipe the surface with a damp cloth as needed. Remove spills immediately. If stains and dirt cannot easily be removed with a damp cloth, a cleaning machine for furniture and carpets can be used with lukewarm water. Make sure to use as little water and soap as possible. Please follow the machine and cleaning agents instructions carefully. Professional dry cleaning is also an option. Pilling is a natural occurrence on products which are made of natural fibres, such as wool. The pilling will reduce over time and can easily be removed with vacuuming or a "fabric-shaver". We do not recommend impregnation of our wool fabrics.

Fabrics

We are uncompromising when it comes to fabric quality, and we cooperate with suppliers that manufacture in accordance with strict quality and environmental requirements. If correctly maintained, the fabrics we have selected will help give the furniture a long life. All our upholstery fabrics meet and exceeds the requirements of mobelfakta.no for Hard Wear. To meet Hard Wear requirements, the fabric must pass international tests for durability, light fastness, pilling resistance, fire safety and colour fastness. Tested in accordance with ISO 105-B02 (Light fastness) EN-12947-2, Martindale (wear test), and with ISO 12945-2 (pilling) and ISO 105x12 (rubbing/dye, wet and dry) and IMO Part 8 compliant, BS 5852: Part 1:1979 s. 0&1 (Fire safety test).

BLOOM

Textured fabric with a touch of nature.

Bloom is a contemporary woven fabric with a distinctive appearance, achieved by blending a variety of coloured yarns and weaving techniques. The textured surface and interplay of colours are reminiscent of rock and forest floors, adding a touch of nature to your home. The colour selection complements leather and plain fabrics beautifully. Bloom is crafted with a high percentage of recycled polyester, is low in maintenance and can withstand hard wear.

NATIVA™
PRECIOUS FIBER

Maintenance and cleaning

We recommend vacuuming the furniture regularly and wipe the surface with a damp cloth as needed. Remove spills immediately. In cases where a damp cloth does not remove the stains, the cover can be machine washed on a wool program (30 degrees Celsius) using a wool wash detergent. Check the care label for a QR code showing how to remove the cover. Pilling is natural on natural fibre products and can easily be removed by vacuuming or by hand. Snags can occur and should be pushed back with a fine blunt tool. Do not pull or cut, this could cause the knit to unravel. We do not recommend impregnation of our wool fabrics.

Fabrics

We are uncompromising when it comes to fabric quality, and we cooperate with suppliers that manufacture in accordance with strict quality and environmental requirements. If correctly maintained, the fabrics we have selected will help give the furniture a long life. All our upholstery fabrics meet and exceeds the requirements of mobelfakta.no for Hard Wear. NATIVA™
PRECIOUS FIBER

Maintenance and cleaning

We recommend vacuuming the furniture regularly and wipe the surface with a damp cloth as needed. Remove spills immediately. In cases where a damp cloth does not remove the stains, the cover can be machine washed on a wool program (30 degrees Celsius) using a wool wash detergent. Check the care label for a QR code showing how to remove the cover. Pilling is natural on natural fibre products and can easily be removed by vacuuming or by hand. Snags can occur and should be pushed back with a fine blunt tool. Do not pull or cut, this could cause the knit to unravel. We do not recommend impregnation of our wool fabrics.

Fabrics

We are uncompromising when it comes to fabric quality, and we cooperate with suppliers that manufacture in accordance with strict quality and environmental requirements. If correctly maintained, the fabrics we have selected will help give the furniture a long life. All our upholstery fabrics meet and exceeds the requirements of mobelfakta.no for Hard Wear. To meet Hard Wear requirements, the fabric must pass international tests for durability, light fastness, pilling resistance, fire safety and colour fastness. Tested in accordance with ISO 105-B02 (Light fastness) EN-12947-2, Martindale (wear test), and with ISO 12945-2 (pilling) and ISO 105x12 (rubbing/dye, wet and dry) and IMO Part 8 compliant, BS 5852: Part 1:1979 s. 0&1 (Fire safety test).

PEONY

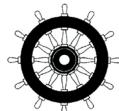

Natural, soft Norwegian wool with a classic look.

Peony is a classic wool fabric available in soft neutral colours. The small herringbone pattern provides a classic yet modern look, creating a warm atmosphere with a sense of quality and timeless design. Wool is a natural fibre that breathes, making it feel warm when it is cold and cool when it is hot. The wool yarn also makes the fabric durable.

Maintenance and cleaning

We recommend to vacuum the furniture regularly and wipe the surface with a damp cloth as needed. Remove spills immediately. If stains and dirt cannot easily be removed with a damp cloth, a cleaning machine for furniture and carpets can be used with lukewarm water. Make sure to use as little water as possible. Please follow the machine and cleaning agents instructions carefully. Pilling is a natural occurrence on products which are made of natural fibres, such as wool. The pilling will reduce over time and can easily be removed with vacuuming or a "fabric-shaver". We do not recommend impregnation of our wool fabrics.

Maintenance and cleaning

Tulip is a classic, durable fabric quality that is easy to clean. To help the surface retain its appearance, we recommend that you vacuum the furniture regularly and wipe the surface with a damp cloth as needed. Remove spills immediately. If stains and dirt cannot easily be removed with a damp cloth, a cleaning agent and stain remover from the Stressless® Fabric Care Kit may be used. Be particularly aware of areas that are in contact with skin and hair, such as armrests and neck support. These areas are more exposed to grease and dirt and should be cleaned regularly.
